New York State Department of Environmental Conservation requires that pesticide applicators provide specific or approximate application dates. The owner/customer may ask for specific dates of application and if requested, the applicator/business must inform the owner/customer of the specific dates and include these dates in the contract.

Included is a list of program rounds and the services provided at each round. Also included is a list of pesticides the applicator/business may use and the warning label information from the manufacturer's labels. This is a multi-year, continuous agreement which will automatically renew from year to year.

We will send you updated prices and a schedule of approximate and alternate application dates each year, before providing service for the season. You may cancel or change this agreement at any time for any reason.
